Retail Association Applauds State Order to Allow Pharmacy Technicians to Administer COVID-19 Vaccines

The Retail Association of Nevada announced Monday their support of Nevada’s Emergency Regulation 2 signed by Governor Steve Sisolak to allow pharmacy technicians to administer COVID-19 vaccines when they become available.

“We applaud the initiative and forward thinking of this emergency regulation that will keep our pharmacy technicians safe while providing critical and convenient locations for vaccines to be administered,” said Liz MacMenamin, RAN’s Vice President of Government Affairs. “It is a top priority for Nevada’s pharmacies to be ready and able to move quickly as soon as a vaccine becomes available.”

The Retail Association and its pharmacy members actively participated with the State Board of Pharmacy to draft the proposed regulation adopted by Governor Sisolak and look forward to providing this critical service for Nevadans.

The Retail Association of Nevada is Nevada’s leading voice for business. Nevada’s retail industry includes nearly 8,600 businesses employing more than 145,600 workers across the state.
